**Abstract:** Rural development as an old theme has been evolving new strategies and fresh contents. The earlier definition of rural development assumed the village to be a homogenous entity. Rural Poverty in rural areas though poverty is hidden, it is real and predominant than urban areas. Poverty of course is a tragedy, but dimensions of urban poverty are documented well and even glamorized in music and film industries. But the rural poor are still overlooked and considered backward. Sustainable Rural Development is improving the quality of life for the rural poor by developing capacities that promote community participation, health and education, food security, environmental protection and sustainable economic growth, thereby enabling community members to leave the cycle of poverty and achieve their full potential. This paper contains the main objectives is study the goals of rural development, objectives of rural development, rural poverty and sustainable development goals in India.

**Keywords:** Rural, Poverty, Health, Education, Development, Sustainable.

### **Introduction**

Rural development has been one of the most formidable and fundamental aspect of India's developmental efforts. The concept of development since seventies has undergone a change and has become more comprehensive. There are different concepts of rural development which have been propounded by various policy makers In the post independence period.
